# Universal cleaning pad MICRO

## The clean solution

The Universal cleaning pad MICRO ensures a quick and thorough clean thanks to its dual action feature.

The **high-functional microfibres** fully absorb dirt and can even completely remove grease and oil. Surfaces are cleaned right down into the deepest pores.

The **polypropylene bristles** penetrate right into the recesses of tiles and grout and remove deep-seated dirt as well as limescale deposits and stubborn encrustations.

The **meiko Universal cleaning pad MICRO is the clean alternative to the usual scouring pad.** Thanks to its handy shape and internal seams, it easily reaches right down into the corners and those hard to reach edges.

Ask your personal contact about meiko products for professional cleaning.
