Uncompromising on hygiene

meiko provides intelligent product solutions for optimum cleaning

Standards are high when it comes to cleanliness and hygiene. At the same time, good management of time and cost is indispensable. The meiko product range was developed to live up to these tasks. It fulfils the highest standards with regard to both hygiene and cost-effectiveness.

meiko's cleaning experts have worked closely with customers to develop a range of products that work together in the best possible way and help to optimise and facilitate work processes.

RW3 Hermetic

Working together to beat germs

The **CARE Car Med**, the **Micro 3000** and the **Stargrip** are real team players: each one is highly functional on its own, but together they form an excellent combination for extremely sensitive hygiene areas.

Our cleaning trolley concept developed especially according to HACCP and the current requirements of future-oriented time management can be combined flexibly and offers sufficient space for the required cleaning needs.

With up to four 6 liter buckets sorted by color and two Hermetic buckets with lids, the model **RW3 Hermetic** shown is ideal for cloth and mop preparation.

For cleaning surfaces: The **Micro 3000** dry or damp-cleans smooth and porous surfaces quickly and without streaks. It is also highly durable. The micro-fibre cloth can withstand more than 100 washes at up to 95°C, as well as cleaning-product additives. The **Micro 3000** is available in various colours, which makes it easy to assign to different areas of use.

The **Stargrip** micro-fibre mop scores points with its high-low effect: Raised polyester strips clean visibly better on smooth and lightly textured surfaces. Its improved gliding ability and the high water and dirt retention capacity

save effort and time.

Professional cleaning made in Germany

meiko Textil GmbH is one of the leading German companies in the professional cleaning sector.

The company has been developing and producing cleaning products for its domestic and international clients in the areas of commercial cleaning, health-care, hospitality and catering as well as industry for over 40 years.

meiko manufactures the majority of its products in Germany. This not only ensures quality and high functionality, but also allows materials and cost to be checked regularly and adjusted ecologically and economically.
