

Non-woven production

Made by meiko

Professional solutions
for your requirements

Product:
All-purpose wipe

Product variety from Germany

All-purpose wipe

The all-purpose wipe quickly and easily ensures cleanliness for dry and wet cleaning.

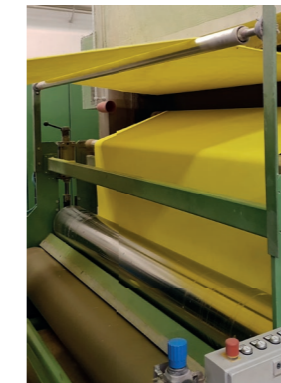

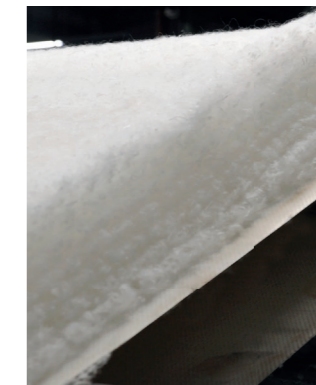

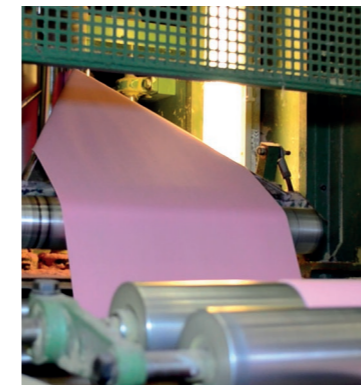

Super shabby

The thermo-set floor cloths can be used anywhere and absorb a huge amount of moisture.

Universal wipe with pictograms

The highly absorbent universal wipe with antibacterial coating cleans hygienically and streak-free.

Non-woven products made to measure

At first glance, cloth often seems to be just cloth. We make the difference for you. Because we design and manufacture your product directly at our locations in Germany.

This enables us to coordinate and control the entire manufacturing process from the development of ideas and the selection of materials to production and delivery. Thanks to various processing and finishing options, we produce non-woven cloths that fit your requirements exactly.

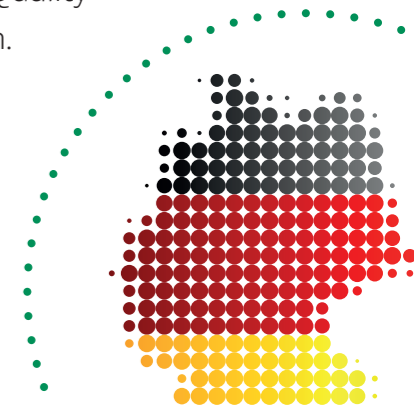

Certified quality

The majority of the surface and floor cloths made of 100% viscose and viscose/polypropylene

are certified according to the Oekotex standard. Year after year, an independent institute tests whether our cloths meet the strict requirements for textiles used close to the skin.

Care and experience

For almost 50 years now, it's been meiko's goal to develop products that help you to perform tasks more easily and in a resource-optimised manner. We do not make any compromises and set high standards. Quality is our reliable companion. Regular audits ensure a consistently high level.

Benefit from our experience

We will advise you in detail
on a sensible product selection.
