natural
0 % microplastic

Produkt: meiko natural – 0 % microplastics

meiko natural Close up

meiko natural cleans with the power of 80 % viscose and 20 % polylactide fibres (PLA). Thus, the non-woven all-purpose cloth ensures spotlessly clean results every day on smooth and slightly textured surfaces, and does completely without microplastics. meiko natural is universally applicable and extremely absorbent. The non-woven cloth is washable at 95 °C.

Free of microplastics

PLA consists of 100 % renewable raw materials. Thanks to its properties, PLA is an efficient alternative to fibres made of fossil materials. Among other things, it has a higher elasticity than PET.

0 % microplastic

Sustainable

meiko natural consists of completely biodegradable raw materials (industrially compostable) and is therefore completely recyclable.

Quality made in Germany

Like all meiko non-woven cloths, meiko natural is manufactured in Germany. Careful processing and strict controls guarantee the highest quality standards.
